

REACH Policy Statement

Laser Quantum designs, manufactures and supports advanced lasers.

The product profile includes over 30 different laser systems, spanning wavelengths from the UV to the infrared and providing a wide range of output powers. This comprehensive range of laser systems is driven by a sophisticated range of power supply units (PSU) incorporating advanced integrated firmware and customer integrated software capability.

LQ is the leading supplier to original equipment manufacturers (OEMs) of solid state continuous wave lasers, femtosecond lasers, and optical light engines for the bio-medical market.

Our products are considered 'Articles' as defined in the European REACH Regulation 1907/2006.

Laser Quantum obligations under the REACH (Registration, Evaluation, Authorisation, and Restriction of Chemicals) Regulations 1907/2006 have been determined as follows:

- There are no substances included in the REACH Candidate List of Substances of Very High Concern (SVHC) or Annex XIV intended to be released from our products, therefore there is no obligation for registration of substances.
- There are no substances included in the REACH Candidate List of Substances of Very High Concern (SVHC) of Annex XIV for authorisation above the tonnage threshold of 1 tonne per year, therefore there is no obligation for notification of substances in articles.
- To the best of our knowledge and belief there are no substances included in the REACH Candidate List of Substances of Very High Concern (SVHC) of Annex XIV for authorisation above the concentration in article threshold of 0.1% (w/w). Should any of these substances be found present in our products above this threshold, then we have an obligation to communicate information on substances in articles to relevant interested parties.
- It is our policy that our suppliers comply with their obligations under the REACH Regulations 1907/2006 for any substances and articles supplied to Laser Quantum and communicate information to us should any of the 'SHVC' substances above the concentration in article threshold of 0.1% (w/w) be present in the supplies to Laser Quantum.

For and on behalf of Laser Quantum Limited
